

WELCOME

from the

CTOTF Chairman

Many thanks for supporting CTOTF in our 43rd year of bringing together power professionals and industry leaders for in-depth discussions on the issues that are most important to us.

Our mission at CTOTF is to be the premier mechanism for the exchange of information to shape, lead, and advise the power-generation industry.

Our Leadership Committee and our Board are dedicated to delivering on our mission, with our 2018 Conference Theme focused on ***“HOW TO WIN in the Changing Plant Operating Environment”*** with industry-leading Agendas. We continue to feature our Advanced Frame Units with a focus on User-to-User Experiences across all OEMs at this Conference.

We are also continuing to use our Monday General Session to interactively discuss the “bigger picture” beyond our individual plants. At this Spring’s General Session, we are focusing on ***Battery Storage***. You will experience a diverse and high-powered Panel that will address Battery Storage Operations and the integration of CT Operations and Maintenance, as Renewables become a larger part of our reality. This panel discussion will be highly interactive, and I invite you to participate and share your individual perspectives.

In 2018 we are announcing the ***CTOTF Leadership Certification Program*** which provides training specific to the power-generation industry. We are committed to training today’s leaders and leaders of the future – and we’ll share more details during this conference.

In closing, I want to welcome our first-time attendees who represent a third of conference participants. You will find that CTOTF is uniquely organized to provide roundtables on all machine types, balance-of-plant (BOP) equipment, and technical & leadership training – ***all in one conference location***. I look forward to challenging discussions and sharing ideas!

Jack Borsch
CTOTF Chairman
